
TROJAN GOLD INC.
FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2021 AND 2020
(EXPRESSED IN CANADIAN DOLLARS)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Trojan Gold Inc.

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Trojan Gold Inc. (the Company), which comprise the statements of financial position as at December 31, 2021 and 2020 and the statements of loss and comprehensive loss, statements of cash flows and statements of changes in equity for the years then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2021 and 2020 and its financial performance and its cash flows for the years then ended, in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with those requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Relating to Going Concern

We draw your attention to Note 1 in the financial statements, which indicates that the Company incurred a comprehensive loss of \$266,905. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Information Other than the financial statements and Auditor's Report Thereon

Management is responsible for the other information. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other

matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Pat Kenney.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

1. Nature of operations and going concern

Trojan Gold Inc. (“TGI” or the “Company”) was incorporated in 2012 under the provisions of the Business Corporations Act (Alberta) and is trading on the Canadian Securities Exchange (“CSE”) under the symbol ‘TGII’. The Company is engaged in the acquisition and exploration of mineral resource properties in Canada and the Dominican Republic. Substantially all of the Company’s efforts are devoted to financing, exploring and developing these properties. The Company’s head office is 401 - 82 Richmond Street East, Toronto, Ontario, M5C 1P1. It is presently pursuing a listing on the Canadian Securities Exchange (“CSE”).

These financial statements have been prepared on a going concern basis which assumes that the Company will continue in operations for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business. Realization values may be substantially different from carrying values as shown and the financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

The mineral properties of the Company are in the exploration stage and, as a result, the Company has no source of operating cash flow. The exploration and development of the Company’s properties depend on the ability of the Company to obtain financing. The Company has incurred losses in previous periods and has not yet achieved profitable operations, with a net loss of \$266,905 for year ended December 31, 2021 (year ended December 31, 2020 - loss of \$220,053). At December 31, 2021, the Company had no source of operating cash flow and an accumulated deficit of \$1,768,436 (December 31, 2020 - \$1,501,531). At December 31, 2021, the Company had working capital of \$803,601 (December 31, 2020 - \$478,294). These conditions raise material uncertainties as to the Company’s ability to continue as a going concern.

The Company’s future viability depends upon the acquisition and financing of mineral exploration or other projects. If the mineral projects are to be successful, additional funds will be required to develop these resources and to place them into commercial production. The only source of future funds presently available to the Company is through the issuance of common shares or through the sale of an interest in any of its properties or assets in whole or in part. The ability of the Company to arrange such financing or the sale of an interest will depend, in part, on prevailing market conditions as well as the business performance of the Company. There can be no assurance that the Company will be successful in its efforts to arrange the necessary financing, if needed, on terms satisfactory to the Company. If additional financing is arranged through the issuance of shares, control of the Company may change and shareholders may suffer significant dilution.

The outbreak of the novel strain of coronavirus, specifically identified as “COVID-19”, has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods. The Company is monitoring the business environment as a result to ensure minimal disruption to business operations. The Company continues to be in operations as of the current date.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

2. Significant accounting policies

The Company applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

The policies applied in these financial statements are based on IFRSs issued and outstanding as of March 29, 2022, the date the Board of Directors approved the statements.

The financial statements are presented in Canadian dollars, which is the Company's functional currency and have been prepared on a historical cost basis, with the exception of certain financial assets and liabilities which are measured at fair-value, as explained in the accounting policies below.

Critical accounting judgements, estimates and assumption

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting year. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Information about critical judgements in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statement are discussed below:

Title to mineral property interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company titles. Such properties may be subject to prior agreement or transfers and titles may be affected by undetected defects.

Non-current asset impairments

The application of the Company's accounting policy for impairment on exploration and evaluation ("E&E") assets requires judgement in determining if the facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

Exploration and evaluation expenditures

The application of the Company's accounting policy for E&E expenditures capitalized requires judgement in determining which expenditures are recognized as exploration and evaluation assets and applying the policy consistently. In making this determination, an entity considers the degree to which the expenditure can be associated with finding specific mineral resources.

Promissory note receivable impairment

The Company applied judgement when estimating the future cash flows from its promissory note receivable. In making this assessment, the Company considered the credit risk of the counter-party, the quality of the underlying security and other relevant factors.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

2. Significant accounting policies (continued)

Critical accounting judgements, estimates and assumption (continued)

Valuation allowance for deferred income tax assets

Each year, the Company evaluates the likelihood of whether some portion of deferred tax assets, if any, will not be realized. This evaluation is based on historic and future expected levels of taxable income, the timing of reversals of taxable temporary timing differences that give rise to deferred tax liabilities, tax planning initiative, and deferred tax rates.

Going concern

The assessment of the Company's ability to continue as a going concern involves judgement regarding future funding available for its exploration projects and working capital requirements.

Investment in Tashota Resources Inc.

The Company applied judgement when estimating the value of the investment in Tashota Resources Inc. ("TRI") and not based on observable market data.

Use of estimates

The estimates and associated assumptions are based on historical experience and various factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows. Significant estimates include the valuation of the due from related party balance, valuation of common share purchase warrants using the black-scholes pricing model and the measurement of common shares issued for non-cash consideration.

Financial instruments

Recognition

The Company recognizes a financial asset or financial liability on the statement of financial position when it becomes party to the contractual provisions of the financial instrument. Financial assets are initially measured at fair value, and are derecognized either when the Company has transferred substantially all the risks and rewards of ownership of the financial asset, or when cash flows expire. Financial liabilities are initially measured at fair value and are derecognized when the obligation specified in the contract is discharged, cancelled or expired.

A write-off of a financial asset (or a portion thereof) constitutes a derecognition event. Write-off occurs when the Company has no reasonable expectations of recovering the contractual cash flows on a financial asset.

Classification and measurement

The Company determines the classification of its financial instruments at initial recognition. Financial assets and financial liabilities are classified according to the following measurement categories:

- ◆ those to be measured subsequently at fair value, either through profit or loss ("FVTPL") or through other comprehensive income ("FVTOCI"); and
- ◆ those to be measured subsequently at amortized cost.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

2. Significant accounting policies (continued)

Financial instruments (continued)

Classification and measurement (continued)

The classification and measurement of financial assets after initial recognition at fair value depends on the business model for managing the financial asset and the contractual terms of the cash flows. Financial assets that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding, are generally measured at amortized cost at each subsequent reporting period. All other financial assets are measured at their fair values at each subsequent reporting period, with any changes recorded through profit or loss or through other comprehensive income (which designation is made as an irrevocable election at the time of recognition).

After initial recognition at fair value, financial liabilities are classified and measured at either:

- ◆ amortized cost;
- ◆ FVTPL, if the Company has made an irrevocable election at the time of recognition, or when required (for items such as instruments held for trading or derivatives); or,
- ◆ FVTOCI, when the change in fair value is attributable to changes in the Company's credit risk.

The Company reclassifies financial assets when and only when its business model for managing those assets changes. Financial liabilities are not reclassified.

Transaction costs that are directly attributable to the acquisition or issuance of a financial asset or financial liability classified as subsequently measured at amortized cost are included in the fair value of the instrument on initial recognition. Transaction costs for financial assets and financial liabilities classified at fair value through profit or loss are expensed in profit or loss.

The Company's financial instruments consist of the following:

Financial Instrument	Classification
Cash and cash equivalents	Fair value through profit or loss
Due from related parties	Amortized cost
Investment in Tashota Resources Inc.	Fair value through profit or loss
Accounts payable and accrued liabilities	Amortized cost
Due to related parties	Amortized cost
Demand loan	Amortized cost

Impairment

The Company assesses all information available, including on a forward-looking basis the expected credit losses associated with any financial assets carried at amortized cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. To assess whether there is a significant increase in credit risk, the Company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition based on all information available, and reasonable and supportive forward-looking information.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

2. Significant accounting policies (continued)

Financial instruments recorded at fair value

Financial instruments recorded at fair value on the statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- ◆ Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- ◆ Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. prices) or indirectly (i.e. derived from prices); and
- ◆ Level 3 – inputs for the assets or liability that are not based on observable market data (unobservable inputs).

As of December 31, 2021 and December 31, 2020, except for cash and cash equivalents and Investment in TRI, none of the Company's financial instruments are recorded at fair value in the statements of financial position. Cash and cash equivalents are classified as Level 1 and Investment in TRI as Level 3.

Option and royalty agreements

Option payments and certain royalties are made at the discretion of the optionee and, accordingly, are accounted for on a cash basis. Option and royalty payments received are treated as a reduction of the carrying value of the related mineral property until the Company's option and royalty payments received are in excess of costs incurred in which case it would be recorded as a recovery in excess of mineral property acquisition costs in the statements of loss.

Mineral property interests

Costs related to the acquisition and exploration of mineral properties are capitalized until a decision is made as to whether or not the assets contain sufficient economic reserves for mine development.

Once the technical feasibility and commercial viability of extracting the mineral resource has been determined, the carrying value of E&E assets net of any impairment loss is transferred to property and equipment.

The direct cost of E&E assets consists of:

- ◆ Acquisition of exploration properties including the cost of acquiring licences and claims
- ◆ Gathering exploration data through topographical and geological studies
- ◆ Exploratory drilling, trenching and sampling
- ◆ Determine the volume and grade of the resource
- ◆ Test work on geology, metallurgy, mining, geotechnical and environmental; and
- ◆ Conducting engineering, marketing and financial studies

The Company assesses E&E assets for impairment when facts or circumstances suggest that the carrying amount of the asset may exceed its recoverable amount. When this is the case, the Company would carry out an impairment test on the asset or group of assets, which requires estimate and judgement in determining the recoverable amount with reference to the fair value of the assets or group of assets less costs to sell or the value-in-use calculation. Where the recoverable amount is determined to be less than the carrying amount, an impairment loss may arise.

If a mineral property interest is abandoned, the acquisition costs will be written off to statement of loss.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

2. Significant accounting policies (continued)

Foreign currency transactions

Monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the current exchange rate. Non-monetary assets and liabilities are translated at historical rates of exchange at the time of the acquisition of assets or obligations incurred. Revenues and expenses are translated at the rate of exchange in effect at the date of the transactions. Foreign exchange translation gains and losses are recorded in operations in the period in which they occur.

Provisions and contingencies

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of long-term assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future restoration cost estimates arising from the decommissioning of plant and other site preparation work is capitalized to exploration and evaluation assets along with a corresponding increase in the restoration provision in the year incurred. Discount rates using a pre-tax risk-free rate that reflect the time value of money are used to calculate the net present value. The restoration asset will be depreciated on the same basis as other exploration and evaluation assets.

The Company's estimates of restoration costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to exploration and evaluation assets with a corresponding entry to the restoration provision. The Company's estimates are reviewed annually for changes in regulatory requirements, discount rates, and effects of inflation.

Income taxes

Current income tax

Income tax expense consists of current and deferred tax expense. Income tax expense is recognized in the statements of loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity.

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. Current tax assets and current tax liabilities are only offset if a legally enforceable right exists to set off the amounts, and the Company intends to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred income tax

Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences, carry-forward of unused tax credits, and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary difference and the carry forward of unused tax credits and unused tax losses can be utilized. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at end of reporting year. Deferred tax relating to items recognized directly in equity is also recognized in equity and not in the statements of loss.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

2. Significant accounting policies (continued)

Deferred income tax (continued)

The carrying amount of deferred tax assets is reviewed at the end of the reporting year and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each statement of financial position date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Earnings (loss) per common share

Basic earnings (loss) per share are computed by dividing the net earnings (loss) applicable by the weighted average number of common shares outstanding during the reporting year. Diluted earnings (loss) per share is computed by dividing the net earnings (loss) by the sum of the weighted average number of common shares issued and outstanding during the reporting year and all additional common shares for the assumed exercise of options and warrants outstanding for the reporting year, if dilutive.

The treasury stock method is used to arrive at the diluted earnings (loss) per share, which is determined by adjusting the earnings (loss) attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all warrants and options outstanding that may add to the total number of common shares. Diluted loss per share do not include the effect of share options and warrants as they are antidilutive.

Related party transactions

Parties are considered to be related if one party has the ability to directly or indirectly control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties. Related party transactions that are in the normal course of business and have commercial substance are measured at the exchange amount.

Equity-based payments

Equity-based share-based payment transactions with parties other than employees are measured at the fair value of goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

The fair value of warrants granted is measured using the black-scholes option-pricing model, taking into account the terms and conditions upon which the warrants were granted.

(Expressed in Canadian Dollars)

2. Significant accounting policies (continued)

Flow-through share issuances

The Company finances a portion of its exploration activities through the issue of flow-through shares issued pursuant to the Canadian Income Tax Act ("Tax Act"). Proceeds received from the issuance of flow-through shares are restricted to be used only for qualifying Canadian exploration and development expenses (as defined in the Tax Act).

Pursuant to the terms of the flow-through share subscription agreements, these shares transfer the tax deductibility of qualifying expenditures to flow-through investors. On issuance, the Company allocates a portion of the subscription proceeds as a flow-through share premium, equal to the estimated premium, if any, that investors pay for the flow-through feature, which is recognized as a premium liability. As expenditures are incurred and applied against the Company's associated flow-through commitment, the premium liability is reduced proportionately, charged as a deferred income tax recovery in operations. A deferred income tax liability is recognized for the estimated foregone tax benefit as a result of the renunciation to the shareholders, offset as a deferred income tax expense, to the extent no deferred income tax assets are on hand and eligible to offset. The Company considers renunciation to have occurred when reported for income tax purposes.

Adoption of new standards

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after January 1, 2021. Many are not applicable or do not have a significant impact to the Company. There are no relevant IFRS's or IFRS interpretations that are effective that would have a material impact on the Company.

New standards not yet adopted and interpretations issued but not yet effective

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after January 1, 2022. Many are not applicable or do not have a significant impact to the Company and have been excluded.

3. Capital risk management

The Company defines capital as consisting of common share capital, warrants reserve and deficit.

The Company's objective in managing capital is to maintain adequate levels of funding to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral property interests and to maintain a flexible capital structure which will optimize the costs of capital at an acceptable risk.

The Company plans to manage its capital structure in a manner that provides sufficient funding for operational activities through funds primarily secured through equity capital obtained in private placements. There can be no assurances that the Company will be able to continue raising capital in this manner.

Although the Company has been successful at raising funds in the past through the issuance of share capital, it is uncertain whether it will be able to continue this form of financing due to the current difficult conditions. The Company makes adjustments to its management of capital in the light of changes in economic conditions and the risk characteristics of its assets, seeking to limit shareholder dilution and optimize its costs of capital while maintaining an acceptable level of risk.

The Company is not subject to any externally imposed capital requirements.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

4. Financial instruments

The Company's financial instruments consist of cash and equivalents, accounts receivable, Investment in TRI, accounts payable and accrued liabilities, due from related parties, and demand loans.

IFRS 13 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The Hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices that are observable for the asset or liability either directly (ie. as prices) or indirectly (ie. derived from prices); and
- Level 3: Inputs that are not based on observable market data.

Fair value hierarchy

Financial assets	Level 1	Level 2	Level 3	Total
December 31, 2021	\$ 501,734	\$ -	\$ 288,732	\$ 790,466
December 31, 2020	\$ 316,207	\$ -	\$ -	\$ 316,207

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, market risk and foreign currency risk.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its obligations. The Company's credit risk relates entirely to cash and due from related parties balance. The Company mitigates its exposure by monitoring the counterparty's ability to repay.

The maximum exposure to credit risk as at December 31, 2021 and 2020 was:

	December 31, 2021	December 31, 2020
Cash and cash equivalents	\$ 501,734	\$ 316,207

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity risk is to ensure there is sufficient capital on hand to meet its financial commitments as they come due.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

4. Financial instruments (continued)

Liquidity risk (continued)

The following table consists of accounts payable and accrued liabilities and sets out contractual maturities (representing undiscounted contractual cash flows) of the financial liabilities outstanding at December 31, 2021:

	2022	2023	2024	2025	Total
Accounts payable & accrued liabilities	\$ 30,320	\$ -	\$ -	\$ -	\$ 30,320
Amount due to related parties	3,000	-	-	-	3,000
Demand loan	5,000	-	-	-	5,000
	\$ 38,320	\$ -	\$ -	\$ -	\$ 38,320

Market risk

Market risk is the risk of loss arising from adverse changes in financial market rates and prices, such as interest rates, the trading price of equity and other securities, and foreign currency exchange rates. Market risk is directly influenced by the volatility and liquidity in the markets in which the underlying assets are traded. Market price fluctuations and fluctuations in the value of equity securities affect the level and timing of recognition in earnings and comprehensive earnings of gains and losses on securities held. General economic conditions, political conditions and many other factors can also adversely affect the stock markets and consequently, the value of the equity securities held

5. Investment in Tashota Resources Inc.

On January 13, 2021, the Company entered into a debt settlement agreement with Tashota Resources Inc., related Company by virtue of a common officer and director, to settle \$192,488 receivable as on the date of the agreement. The Company received 1,924,880 common shares of Tashota Resources Inc at a price of \$0.10 per share. The Company classified the investment in Trojan as a financial asset at fair value through profit and loss (FVTPL). As at December 31, 2021, the shares were valued at \$0.15 per share, based on the share price of a recent private placement completed by Tashota Resources Inc. As such, the Company recognized an unrealized gain of \$96,243.

	As at December 31, 2021	As at December 31, 2020
Tashota Resources Inc - 1,294,880 common shares	\$ 288,732	\$ -

6. Exploration and evaluation assets

Watershed Property, Ontario

The Company holds a 100% interest in 111 mining claims comprising the Watershed property. The property is located 100 kilometres west of the city of Thunder Bay situated in the Shebandowan Greenstone Belt.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

6. Exploration and evaluation assets (continued)

Hemlo South Property, Ontario

The Hemlo South Property comprises 8 mining claims and is situated in the Hemlo Gold Camp, 35 kilometres east of Marathon.

On March 1, 2017, TGI entered into a Letter of Intent with Tashota Resources Inc (“TRI”) (the “TGI-TRI Option”) whereby TRI granted TGI the right to acquire a 50% interest in the property by:

- ◆ Issuing to TRI 1,250,000 common shares of TGI (issued).
- ◆ Making, or reimbursing TRI for making, certain cash payments required under the TRI-Wahl Option, totaling \$50,000. If TRI makes such payments in cash, and by mutual agreement, TGI can elect to reimburse TRI by issuing common shares from treasury with a deemed value of \$0.10/share (completed).
- ◆ Incurring or reimbursing TRI for exploration expenditures on the property totaling \$250,000 (completed).

The property contains a 3% NSR royalty, of which 2% can be purchased for \$2,000,000 at any time.

TRI and TGI share a common officer and director.

On January 22, 2021, TRI and the Company entered into a joint venture agreement (the “**Joint Venture Agreement**”) which sets out the terms of their joint venture arrangement regarding the Hemlo South Property. The Joint Venture Agreement provides that each of the Company and TRI has a 50% working interest in the Hemlo South Property, which is subject to the NSR royalty in favour of Wahl.

The Joint Venture Agreement provides for the following: (i) management and budget control is to be by a joint management committee; (ii) each party will have an initial WI of 50% and a deemed initial contribution of \$450,000; (iii) TRI and the Company will be joint operators, unless the interest of either party is diluted below 50%, in which case, the party with the larger WI will have the right to become the operator; (iv) budgets will be set annually, or more frequently if requested by either party; (v) technical reports will be prepared in a timely manner on all activities, submitted to Wahl and reported to the MNDM for assessment credit; (vi) if either party (a “Non-Contributing Party”) is unable or unwilling to provide its pro rata share of an approved budget, the other party (the “Contributing Party”) will have the right to provide the difference between the amount which the Non-Contributing Party has contributed to an approved budget, and its pro rata share of the approved budget; and (vii) the WI of a Non-Contributing Party shall be diluted according to the industry-standard formula.

- i) In May 2020, pursuant to a brokered private placement, the Company issued 4,000,000 Units at a price of \$0.10 per Unit for gross proceeds of \$400,000. Each unit consists of one common share and one warrant. Each warrant entitles the holder to purchase one TGI common share at a price of \$0.15 before the expiry date of December 31, 2021. These warrants were assigned a value of \$128,600 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows: risk free rate of 0.27%; expected life of 1.61 years; expected volatility: 140%; and a weighted average share price: \$0.07. In connection with the offering, legal fees of \$2,050 was paid.
- ii) In August 2020, the Company entered into a debt settlement agreement to settle \$20,000 owed to certain of its consultants, through the issuance of 200,000 common shares. The common share issuance was completed on October 15, 2020.
- iii) In November 2020, the Company completed a private placement consisting of 1,350,000 units at a price of \$0.10 per unit, and 905,000 flow-through units, at a price of \$0.10 per flow-through unit, for aggregate gross proceeds of \$225,500. In connection with the offering, the Company issued 152,400 common shares as brokerage compensation and paid commission of \$15,240 and legal fees of \$4,945. The 152,400 common shares issued as brokerage compensation were valued at \$10,668.

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

9. Share capital (continued)

b) Common shares issued

(iii)(continued) Each unit consisted of one Common Share and one Common Share purchase warrant, each warrant entitling its holder to purchase one Common Share at a price of \$0.15 per Common Share with 350,000 warrants expiring on December 31, 2021, and the remainder expiring on July 1, 2022. These warrants were assigned a value of \$39,600 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows: risk free rate of 0.24%; expected life of between 1.09 and 1.59 years; expected volatility: 133%; and a weighted average share price: \$0.07.

Each flow-through unit consisted of one Common Share to be issued as a flow-through share and one half (1/2) common share purchase warrant, each whole warrant entitling its holder to purchase one Common Share at a price of \$0.15 per Common Share until July 1, 2022. These warrants were assigned a value of \$13,900 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows: risk free rate of 0.24%; expected life of 1.59 years; expected volatility: 133%; and a weighted average share price: \$0.07.

All warrants issued in November 2020, are subject to acceleration, such that should the Common Shares trade on an exchange for five (5) or more consecutive days at a price of \$0.30 or greater, the Company may, at its option, provide written notice to the holder requiring that the warrants be exercised within 30 days of the date of the notice, failing which the warrants shall immediately thereafter expire.

iv) In December 2020, the Company completed a private placement consisting of 1,150,000 units at a price of \$0.10 per unit, and 475,000 flow-through units, at a price of \$0.10 per flow-through unit, for aggregate gross proceeds of \$162,500. In connection with the offering, the Company issued 62,000 common shares as brokerage compensation and paid commission of \$6,200 and legal fees of \$5,708. The 62,000 common shares issued as brokerage compensation were valued at \$4,490.

Each unit consisted of one Common Share and one Common Share purchase warrant, each warrant entitling its holder to purchase one Common Share at a price of \$0.15 per Common Share, expiring on July 1, 2022. These warrants were assigned a value of \$33,700 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows: risk free rate of 0.25%; expected life of 1.54 years; expected volatility: 129%; and a weighted average share price: \$0.07.

Each flow-through unit consisted of one Common Share to be issued as a flow-through share and one half (1/2) common share purchase warrant, each whole warrant entitling its holder to purchase one Common Share at a price of \$0.15 per Common Share until July 1, 2022. These warrants were assigned a value of \$7,000 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows: risk free rate of 0.24%; expected life of 1.59 years; expected volatility: 129%; and a weighted average share price: \$0.07.

All warrants issued are subject to acceleration, such that should the Common Shares trade on an exchange for five (5) or more consecutive days at a price of \$0.30 or greater; the Company may, at its option, provide written notice to the holder requiring that the warrants be exercised within 30 days of the date of the notice, failing which the warrants will immediately thereafter expire.

v) In April 2021, the Company completed a private placement consisting of 950,000 units at a price of \$0.10 per unit, and 600,000 flow-through units, at a price of \$0.10 per flow-through unit, for aggregate gross proceeds of \$155,000. In connection with the offering, the Company issued 40,000 common shares as brokerage compensation and paid commission of \$4,000. The 40,000 common shares issued as brokerage compensation were valued at \$2,400.

(Expressed in Canadian Dollars)

9. Share capital (continued)

b) Common shares issued (continued)

v) (continued) Each unit consisted of one Common Share and one Common Share purchase warrant, each warrant entitling its holder to purchase one Common Share at a price of \$0.15 per Common Share, expiring on December 31, 2023. Each flow-through unit consisted of one Common Share to be issued as a flow-through share and one common share purchase warrant, each whole warrant entitling its holder to purchase one Common Share at a price of \$0.15 per Common Share until December 31, 2023. These warrants were assigned a value of \$58,700 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows: risk free rate of between 0.29 and 0.30%; expected life of between 2.67 and 2.69 years; expected volatility: between 131% and 137%; and a weighted average share price: \$0.06.

All warrants issued are subject to acceleration, such that should the Common Shares trade on an exchange for five (5) or more consecutive days at a price of \$0.30 or greater; the Company may, at its option, provide written notice to the holder requiring that the warrants be exercised within 30 days of the date of the notice, failing which the warrants will immediately thereafter expire.

vi) On August 31, 2021 the Company completed a private placement consisting of 4,500,000 units at a price of \$0.10 per unit for aggregate gross proceeds of \$450,000. Each unit consisted of one Common Share and one Common Share purchase warrant, each warrant entitling its holder to purchase one Common Share at a price of \$0.15 per Common Share, expiring on August 31, 2024. These warrants were assigned a value of \$169,000 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows: risk free rate of 0.35%; expected life of between 3 years; expected volatility: 127%; and a weighted average share price: \$0.06. The warrants are subject to acceleration, such that should the Common Shares trade on an exchange for five (5) or more consecutive days at a price of \$0.20 or greater; the Company may, at its option, provide written notice to the holder requiring that the warrants be exercised within 30 days of the date of the notice, failing which the warrants will immediately thereafter expire.

vii) On December 17, 2021, the Company issued 200,000 common shares to a consultant in payment of \$20,000 of legal fees. The common shares issued had a price of \$0.25 based on the fair value. As a result, the Company recorded a loss on debt settlement of \$30,000.

10. Warrants

The following table reflects the continuity of warrants for the year ended December 31, 2021 and December 31, 2020:

	Number of warrants	Amount
Balance, December 31, 2019	7,900,640	\$ 545,500
Issued (note 9)	7,190,000	222,800
Expired	(7,900,640)	-
Balance, December 31, 2020	7,190,000	\$ 768,300
Issued (note 9)	6,050,000	227,700
Expired	(4,350,000)	-
Balance, December 31, 2021	8,890,000	\$ 996,000

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

10. Warrants (continued)

The following table reflects the actual warrants outstanding and exercisable as of December 31, 2021:

Number of warrants outstanding	Grant date fair value (\$)	Exercise price (\$)	Expiry date
2,840,000	85,200	0.15	July 1, 2022
1,550,000	58,700	0.15	December 31, 2023
4,500,000	169,000	0.15	August 31, 2024
8,890,000	312,900	0.15	

11. Loss per share

For the year ended December 31, 2021, basic and diluted loss per share has been calculated based on the loss attributable to common shareholders of \$266,905 (year ended December 31, 2020 - \$220,053) and the weighted average number of common shares outstanding of 35,425,214 (year ended December 31, 2020 - 27,306,822). Diluted loss per share did not include the effect of warrants as they are anti-dilutive.

12. Related party transactions

Related parties include the Board of Directors, close family members and enterprises that are controlled by these individuals as well as certain persons performing similar functions.

Related Party	Nature of Relationship
Charles Elbourne	Chief Executive Officer
Parklane Securities Inc.	Controlled by Charles Elbourne
Interbanc Capital Corp	Common officer and director, Charles Elbourne
Tashota Resources Inc.	Common officer and director
Carl McGill	Director, Secretary, Treasurer, Senior Vice President of Corporate Development
Rodney Barber	Director
Victor Hugo	Chief Financial Officer

The noted transactions below are in the normal course of business and are measured at the exchange amount, as agreed to by the parties, and approved by the Board of Directors in strict adherence to conflict of interest laws and regulations.

a) The Company entered into the following transactions with related parties:

- i) During the year ended December 31, 2021 the Company paid management consulting fees of \$15,078, (year ended December 31, 2020 - \$11,581), to Charles Elbourne, director and Chief Executive Officer of the Company.
- ii) During the year ended December 31, 2021 the Company paid management consulting fees of \$14,700 (year ended December 31, 2020 - \$11,900), to Interbanc Capital Corp., a related Company with a common officer and director, Charles Elbourne.
- iii) During the year ended December 31, 2021 the Company paid management consulting fees of \$18,000, (year ended December 31, 2020 - \$9,195), to Carl McGill, director and Secretary-Treasurer, Senior Vice President of Corporate Development, of the Company.

Unrecognized deferred tax assets

Deferred income taxes are provided as a result of temporary differences that arise due to the differences between the income tax values and the carrying amount of assets and liabilities. Deferred income tax assets have not been recognized with respect to the following deductible temporary differences:

	2021	2020
Deferred Tax Assets		
Deferred transaction costs and other	\$ 5,355	\$ 17,272
Non capital ax losses carried forward	335,405	243,493
Mineral interests	11,482	8,263
Capital losses carried forward	52,215	52,215
Deferred tax assets	404,457	321,243
Less: deferred tax assets not recognized	(404,457)	(321,243)
Net deferred tax assets	\$ -	\$ -

Trojan Gold Inc.

Notes to Financial Statements

Years Ended December 31, 2021 and 2020

(Expressed in Canadian Dollars)

13. Income taxes (continued)

Loss carry forwards

As at December 31, 2021, the Company has estimated non-capital losses of \$1,265,680 available to reduce future taxable income for income tax purposes, expiring at various date between 2032 and 2041. The Company has cumulative Canadian and foreign exploration and development expenses, available to offset future taxable income for income tax purposes of \$580,913, which can be carried forward indefinitely.

The potential benefit of these losses and deductible temporary differences in excess of the deferred tax liabilities have not been recognized in these financial statements as it is not considered probably that sufficient future tax profit will allow the deferred tax assets to be realized.

14. Commitments

Flow-through commitment:

As of December 31, 2021, the Company must incur \$138,000 in eligible exploration expenditures on or before December 31, 2022 (as pre 2021, meets Covid exception for extra 12 months) and \$60,000 in eligible exploration expenditures on or before December 31, 2022. At December 31, 2021, the Company's remaining commitment was \$199,000 (December 31, 2020 - \$138,000).
